**Omron's Face Recognition Technology Secures Access Control**  
PR Newswire  
Tuesday, March 25, 2003 10:01 EST  
JOURNAL CODE: PR LANGUAGE: ENGLISH RECORD TYPE: FULLTEXT  
DOCUMENT TYPE: NEWSWIRE  
WORD COUNT: 945

TEXT:

**Omron** Transaction Systems, Inc., an indirect subsidiary of **OMRON** Corporation, announced today its new **Face** Recognition Access Control Software Development Kit, FaceRecoACS(TM) SDK.

**Omron** has licensed Eyematic's Facial Recognition Software for use in FaceRecoACS and its FaceKey brand **face** recognition systems. Eyematic's technology was named "Number one" in the DoD 1996 FERET ( **Face** Recognition Technology) Program, and again recently ranked among the "Top Three Best Commercial Systems" in the U.S. Government National Institute of Standards and

Technology 2002 **Face** Recognition Vendor Tests (FRVT) Evaluation (see the full results available for review and download at...

...the developmental tools for security system integration through its API (Application Program Interface) Specifications and **Face** Recognition Software Engine. To operate the system, an Access Panel -- equipped with a digital camera...

...in total.

"The FaceRecoACS product incorporates several significant advantages," said Mr. Takeki Nemoto, CEO of **Omron** Transaction Systems, Inc. "For example, the product recognizes the difference between one of our sales...

...and his identical twin brother. In addition, it is very fast as well, matching a **face** in a second."

**Omron** 's product is based on the "Gabor-wavelet" and "Graph Matching" technology, which allows for...

...The technology also matches against changes in facial expressions from aging and emotions. In addition, **Omron** 's FaceRecoACS uses state-of-the-art optical engineering, which makes it possible to recognize **faces** in dim lighting.

The FaceRecoACS Software can be used in combination with other biometrics such...

...software into kiosks or ATM machines as added protection against identity theft. The product stores **face** information records as digital data such that no facial images can be reconstructed back from that database, a prerequisite for privacy protection.

**Omron** recently installed a FaceKey stand-alone facial recognition access control system, which also incorporates the Eyematic's **face** recognition software engine, at the University of Missouri - Rolla Nuclear Research Reactor (UMRR). The **face** recognition technology is being used at the UMRR for increased security to address our nation...

...engineering and director of the nuclear reactor. "UMRR is the first American campus to test **Omron** 's FaceKey technology, which essentially fingerprints a **face**."

The FaceKey system typically stores four **templates** of an individual's **face** in its database. When a button on the access panel is pressed by an individual standing directly in front of the access panel, a camera quickly scans his or her **face**. If the control unit recognizes this individual's **face** as one already registered, the door is unlocked. If the person is not

recognized, the...
